andreas@london:~\$ cat README.md

ITSM architect and Atlassian SME with more than 15 years of enterprise service management experience. I design and ship Jira Service Management and Atlassian Assets platforms, CMDB and IT Asset Management schemas, and the automation and governance that keep them running. Through my consultancy **LT.Solutions** I deliver that work and build **LaunchPad for JSM** alongside it, a Forge Marketplace app live at v2.12. AI-assisted engineering shortens build, QA and documentation cycles; architecture, decisions and governance stay human-led.

LaunchPad for Jira Service Management

Forge app on the Atlassian Marketplace, bootstrapped solo. Reusable governed Assets schemas, an Excel import pipeline with reference resolution, and programmatic automation via the Automation Rule Management API.

Schema library

13 production CMDB schemas spanning core CMDB, service catalogue, enterprise architecture and request fulfilment — the deployment baseline behind client engagements.

AI-assisted delivery

Claude Code and Codex workflows for build, review, QA and documentation, plus companion RoVo agent design. Decisions stay human, execution gets faster.

On (On Running) via LT.Solutions

IT Asset Manager Specialist · JSM Assets

Contract engagement for a global sportswear brand, rebuilding the Jira Service Management Assets estate and its governance model as the single source of truth for asset management.

- Rebuilt the Assets and CMDb schema and asset-lifecycle governance model from the ground up.
- Aligned asset controls to NIST CSF 2.0 ID.AM outcomes, with Assets as the evidence base for maturity assessment.
- Ran as-is discovery across the Assets estate, service catalogue and operational tooling, surfacing ownership, integration and data-quality gaps.
- Designed a source-led asset model covering people, hardware, cloud and SaaS data, with automation patterns that minimise manual maintenance.

London

Let's Talk Solutions Ltd LT.Solutions

Founder & Director

Founded LT.Solutions as a JSM and Atlassian consultancy focused on ITSM, Jira Assets, automation and operational governance — and bootstrapped LaunchPad for JSM alongside delivery.

- Shipped 13 production CMDB schemas across core CMDB, service catalogue, enterprise architecture and request fulfilment automation.
- Built an Excel workbook import pipeline that deploys and populates Assets structures with reference resolution.
- Built Automation Rule Management API integration for programmatic JSM automation creation during schema deployment.
- Designed companion Rovo agent capabilities and AI-assisted build, review and QA workflows using Claude Code and Codex.

Nov 2025 → Mar 2026

Remote

Valiantys, UK

Senior Consultant

Perceptive Informatics Led the ServiceNow to JSM migration, designed the Assets CMDB structure for core infrastructure and implemented C-SAT and NPS reporting.

Cancer Research UK Delivered JSM and Assets implementation covering service catalogue design and CMDB schema architecture.

System C Embedded in discovery for a healthcare IT engagement and co-authored the first solution design ahead of implementation.

APAX Finance Delivered a JSM rollout moving support from email into structured request management and service workflows.

Across engagements, designed Assets schemas and Microsoft Entra ID and Intune integration patterns for automated device and identity management.

Mar 2025 → Sep 2025

London

Kantar Media

Technical Architect · Atlassian SME

- Built the JSM MVP for 500 initial users across HR, IT, SOC and NOC ahead of a 4,500-user global rollout.
- Designed the CMDB covering location hierarchies, workstations, network equipment and server infrastructure.
- Integrated JSM with Azure DevOps for handoffs between service and development workflows.
- Designed Assets-driven automation for ticket routing, SLA calculations and escalation paths.
- Delivered knowledge transfer to LATAM, EMEA and APAC stakeholders supporting a global 24/7 service desk.

Jan 2023 → Jan 2025
London

Datasparq
Data Service & Internal IT Manager

- Built the ISO 27001 Confluence documentation hub end to end; praised by external auditors at final certification.
- Migrated internal support from Zendesk to JSM and aligned support workflows with engineering teams.
- Designed GCP and Atlassian cost-optimisation automations via webhooks and APIs; administered Atlassian, Google Workspace, GitHub, GCP and Azure.

Jul 2021 → Jan 2023
London

Zephr, part of Zuora
Global Support Manager

Built and scaled B2B technical support teams in the UK and New Zealand for tier-one clients including Which?, New York Post and News Corp Australia. Designed escalation workflows across Jira, PagerDuty and Slack, led company-wide Jira administration and established a 24/5 global support model.

Nov 2018 → Nov 2020
London

Endeavor Streaming
L2 Support Manager

Built and led Endeavor's first UK-based L2 support department for clients including NBA, EFL, OSN, EuroLeague, FEI, UFC and BT Box Office, and developed proprietary troubleshooting tools that reduced escalations to development teams.

Oct 2011 → Nov 2018
London

NeuLion & Saffron Digital
Technical Support Manager • Customer Service Manager

NeuLion Inc. 2012–2018 — support and client onboarding for streaming platforms used by ITV, Carrefour and BT TV; trained 60+ EFL football clubs onto a new VOD platform.

Saffron Digital 2011–2012 — built support teams for KDDI Videopass and ITV Essentials; led CRM implementation and cost-saving workflow design.
