🔗 Launchpad for JSM | Atlassian Marketplace

📄 ISO 27001 & NIST CSF aligned

ITSM Architect and Atlassian SME specialising in Jira Service Management, Jira Assets (JAM), ITAM, automation, and operational governance. Designs IT Asset Management foundations as a central repository spanning hardware, software, services, and infrastructure, with end-to-end asset lifecycle automation and asset-to-risk and control mapping aligned to frameworks such as NIST CSF and ISO 27001. Founder of LT.Solutions and creator of Launchpad for Jira Service Management, a Forge-based Atlassian Marketplace app packaging reusable, governed CMDB schemas and deployment accelerators for Jira Assets. Proven record leading platform migrations, CMDB and object schema design, operational governance, and knowledge-transfer programmes for organisations at enterprise scale. Uses AI-assisted delivery workflows to accelerate implementation and documentation.

Key Skills

Atlassian
Jira · JSM · Confluence · Jira Assets (JAM) · Opsgenie · Forge · Rovo

Assets & ITAM
Object schema design · CMDB architecture · Asset lifecycle · Hardware / software / service / infrastructure modelling · Reference data

Integration
REST APIs · Webhooks · MDM & device enrolment (Intune, Entra ID) · Azure DevOps · Forge SDK · Automation Rules

Governance & Compliance
NIST CSF (Identify) · ISO 27001 · SOC 2 · Risk-to-asset and control mapping · Audit evidence · Compliance frameworks

Delivery
Service Desk Design · ITSM Migrations · Workflow Automation · SLA Design · Knowledge Transfer · ITIL 4

Delivery Tooling
AI-assisted engineering for build, QA, and documentation · Claude Code · Codex · Rovo

Professional Experience

Let's Talk Solutions Ltd (LT.Solutions) Current Mar 2025 – Present

Founder & Director

Founded LT.Solutions as a Jira Service Management and Atlassian consultancy focused on ITSM, Jira Assets (JAM), automation, and operational governance. Alongside consultancy delivery, designed and bootstrapped **Launchpad for Jira Service Management** v2.10.0, a Forge-based Atlassian Marketplace app delivering reusable, governed CMDB schemas and deployment accelerators for Jira Assets.

- Shipped 13 custom, governed CMDB schemas covering hardware, software, service, and infrastructure asset classes (Basic CMDB, Core Schema, Standard CMDB, Service Catalogue, Priority Matrix, Request Fulfilment Automation (RFA), Enterprise Architecture (EA), and more), all under one subscription
- Built reusable, governed operational data models and deployment accelerators for Jira Assets, packaging schema design, lifecycle structure, and governance scaffolding into repeatable foundations that cut implementation time
- Workbook import pipeline: deploy and populate CMDB objects directly from Excel with full reference attribute resolution
- Built Automation Rule Management API integration enabling programmatic JSM automation rule creation on schema deployment

- Developing companion operational tooling for Assets governance and administration, with implementation and QA accelerated through AI-assisted engineering workflows

Valiantys, UK (Remote)

Nov 2025 – Mar 2026

Senior Consultant

- **Perceptive Informatics** Led ServiceNow to JSM migration; designed Assets (CMDB) schema for core infrastructure and implemented C-SAT/NPS customer satisfaction reporting
- **Cancer Research UK** JSM and Assets implementation covering service catalogue design and CMDB schema architecture
- **System C** Embedded in the Discovery team for this healthcare IT engagement; co-authored the first iteration of the solution design document ahead of full JSM implementation
- **APAX Finance** Delivered JSM rollout migrating the organisation away from email-based support, establishing structured request management and service workflows
- Designed Assets schemas with Microsoft Entra ID and Intune (MDM) integrations for automated device enrolment and identity-driven asset management across engagements

Kantar Media, London

Mar 2025 – Sep 2025

Technical Architect / Atlassian SME

- Built JSM MVP for 500 initial users across HR, IT, SOC, and NOC teams ahead of 4,500-user rollout; designed CMDB covering location hierarchies, workstations, network gear, and full server infrastructure
- Integrated Jira Service Management with Azure DevOps for seamless handoffs between service and development workflows
- Designed automation leveraging Assets data for intelligent ticket routing, SLA calculations, and escalation paths
- Delivered knowledge transfer sessions and trained LATAM, EMEA, and APAC stakeholders for a global 24/7 service desk model

Datasparq, London

Jan 2023 – Jan 2025

Data Service & Internal IT Manager

- Migrated internal support from Zendesk to JSM, streamlining ticket workflows and aligning support with engineering teams
- Designed cost optimisation automations for GCP and Atlassian using webhooks and APIs, reducing SaaS overhead
- Administered Atlassian Suite, Google Workspace, GitHub, GCP, and Azure environments including user management and integrations
- Delivered ISO 27001 Confluence Documentation Hub consolidating policies into a structured, auditable space; praised by auditors at final certification audit

Zephr (A Part of Zuora), London

Jul 2021 – Jan 2023

Global Support Manager

- Built and scaled B2B technical support teams in UK & New Zealand, supporting tier-1 clients (WHICH?, New York Post, News Corp Australia)
- Designed escalation workflows integrating Jira, PagerDuty, and Slack to prevent customer-facing incidents
- Led company-wide Jira administration, optimising workflows and ticket management
- Established 24/5 global support model, improving customer coverage and satisfaction

Endeavor Streaming, London

Nov 2018 – Nov 2020

L2 Support Manager

- Built and led L2 support team for NBA, EFL, OSN, EuroLeague, FEI, UFC, and BT Box Office; launched Endeavor's first UK-based L2 department

- Developed proprietary troubleshooting tools, reducing escalations to development teams

Earlier Experience

Oct 2011 – Nov 2018

Technical Support Manager / Customer Service Manager

- **NeuLion Inc:** Technical Support Manager (2012–2018): led support and client onboarding for streaming platforms used by ITV, Carrefour, and BT TV; trained 60+ EFL football clubs onto new VOD platform
- **Saffron Digital Ltd:** Customer Service Manager (2011–2012): built support teams for KDDI Videopass and ITV Essentials; led CRM implementations and cost-saving workflow design

Certifications & Professional Development

- ITIL® 4: Introduction to Service Management – LinkedIn Learning (Feb 2025)
- IT Service Desk: Service Management – LinkedIn Learning (Feb 2025)
- Jira Administration: Automation – LinkedIn Learning (Feb 2025)
- Agile Project Management with Jira Cloud – Atlassian University (Feb 2025)
- Git Essential Training – LinkedIn Learning (Feb 2025)
- ISO 27001 Implementation & IT Security Compliance – Practical Experience

Education

Kristinehamns Folkhögskola, Sweden

Higher Education equivalent to foundation-level university studies (2005–2006)

Risbergsska Skolan, Sweden

Equivalent to UK A-Levels (1999–2002)
